Cyber Security

Deterrence and IT Protection for Critical Infrastructures

Series: SpringerBriefs in Computer Science

- Includes state-of-the-art documentation on the deterrence power of cyber attacks
- Analyzes the possibility of cyber attacks towards critical chemical industry and chemical safety infrastructure
- Proposes methods for protection and resilience for Industrial Control Systems

The experts of the International Working Group-Landau Network Centro Volta (IWG-LNCV) discuss aspects of cyber security and present possible methods of deterrence, defense and resilience against cyber attacks. This SpringerBrief covers state-of-the-art documentation on the deterrence power of cyber attacks and argues that nations are entering a new cyber arms race. The brief also provides a technical analysis of possible cyber attacks towards critical infrastructures in the chemical industry and chemical safety industry. The authors also propose modern analyses and a holistic approach to resilience and security of Industrial Control Systems. The combination of contextual overview and future directions in the field makes this brief a useful resource for researchers and professionals studying systems security, data security and data structures. Advanced-level students interested in data security will also find this brief a helpful guide to recent research.
